November - Barcelona Boat Show - Barcelona, Spain

November - METS - Amsterdam, Netherlands

## TECH TIPS

### Care & Maintenance of your GLM Aluminum Manifolds

**DO NOT SCRAPE PAINT OFF GASKET  
SURFACES OF ALUMINUM MANIFOLDS.**  
The exposure of bare metal will cause  
corrosion and premature product failure.

Periodic examination of the pencil  
anodes should be performed throughout  
the boating season. Pencil anodes are  
sacrificial and protect the manifold from  
corrosion. Failure to maintain the pencil  
anodes will result in premature product  
failure and voiding of the warranty.
