

Dry Joint Replacement

GLM is Proud to Introduce The Most Cost Effective Alternative for Replacing your Dry Joint Exhaust System!

NEW!
for
2012

GLM Products, Inc. now offers the most cost effective alternative for replacing your dry joint exhaust system. For just over the cost of 1 dry joint elbow, you can purchase our manifold/elbow set and replace both pieces, eliminating your costly dry joint exhaust system!

Water Exit Comparison

GLM No. 51148 has two extra water ports on each side and a larger bottom port compared to the OEM. This allows for maximum water flow through the riser, significantly reducing the chance of blockage from any debris in the water system.
